

ULTRADECK

An Exceptional Line of Synthetic Marine Flooring, UltraDeck®

We are proud to be the first company offering, designing and cutting this superior product in Canada. We've taken our 18 years of marine textiles experience and built a product that we know will perform as expected in the marine environment. From the durable, highest grade PE blend closed cell foam, to the best 3M adhesive possible, no expense was spared in the manufacturing of UltraDeck. As all products are stocked and cut in-house, we are able to offer endless design opportunities as well as faster turn-around times to our clients. Services are available on new builds or when upgrading your current boat. From sail, power, to fishing boats, UltraDeck is an amazing addition to any vessel. As we are passionate boaters ourselves and we look forward to assisting you with your vision.

Manufactured in Canada

3 YR LIMITED WARRANTY (does not cover incorrect install or physical damage).

UV RESISTANCE Highest UV resistance in the industry, tested to over triple the best marine vinyl with no color change.

SALT WATER, Absolutely ZERO effect on the product whatsoever.

WEAR & TEAR Our product was abrasive wheel tested to 500 cycles. In this time the competitors product lost 5.4% of its weight in material. UltraDeck only lost .39% during the same test, leaving us confident in it being the best available for durability.
